# SAPP SPARK

## Amino Innovation

Reduce cost, increase production, nontoxic, eco-friendly

# SAPP SPARK

## Amino Innovation

Sapp Spark is the nutrition of plant that has efficiency to improve and enhance nutrient absorption. Produced from 100% natural ingredients. Produced by scientific innovation which produces new molecule substances for plant ease of use and get the most benefits for plant growth.

Sapp Spark includes organic synthesis substances from nature. 100% safe for human, animal and environment.

**Mixed concentrated amino acid**  
Extracted from protein from sea fish. Amino acid is essential for biological processes for plant both directly and indirectly.

**Sea seaweed**  
Extracted from sea seaweed. Abundance of mineral, vitamin and many nutrients. The most abundant nutrients are potassium, nitrogen and phosphorus. Less than that are secondary nutrients and complementary nutrients.

**Potassium Humate**  
Organic matter extracted from humus which is decomposed from organic matters. It is for soil improvement extracted from nature.

**Chelate EDTA**  
The innovation that synthesize organic substance by developing molecular structure. Its property is to mix positive ion nutrients like iron, zinc, copper, manganese, etc. Well soluble in water. Plants can absorb through roots or leaves easily and get nutrients immediately.

#### Special properties

- ✓ Plants can absorb immediately without photosynthesis
- ✓ Well soluble in water
- ✓ Suitable for all kinds of plant
- ✓ Suitable for all ages of plants from seed or seeding to mature.

By using SAPP SPARK dissolve in water and pour the plant, it can increase the growth rate of germination and keep the seeding strong.

- ✓ Can mix SAPP SPARK with chemical fertilizer or herbicide to increase efficiency
- ✓ No chemical residue in the soil due to organic property and can reduce the usage of chemical fertilizers(reduce cost)
- ✓ Able to improve soil quality
  - More loamy
  - More moisture
  - Increase microbe

#### Cautions

Spray over the area but not too soak due to its concentration. Should mix at the recommended proportion. If plants are overdosed, leaves can be burned.

#### Solution

In case of burned leaves due to overdosed, spray water over the leaves to dilute the nutrient on the leaves and stem. The nutrient will drop on ground to improve soil quality and for plant to absorb again.

#### Storage

Store in shaded area. When opened, keep in closed and dried container to maintain the quality of nutrient.

#### Benefits

- Increase growth rate of any kinds of plant
- Increase roots, shoots and branches growth rate
- Increase the efficiency of nutrient absorption and immediate usage
- Accelerate green leaves, flower color and fruit
- Increase photosynthesis and respiration
- Increase size, weight and production
- Increase flow rate and stimulate water absorption
- Control guard cells and decrease loss of water
- Stimulate function of plant hormones
- Enhance immunity of plant to resist disease and climate change

#### Proportion and Recommendation

Plant	Proportion	Recommendation
Fruit bearing	1 gram per 20 litre of water	- Spray over the area - Spray over every parts of the plants - Spray every 15-30 days
Rice paddy	0.5 grams per 20 litre of water	
Farm plant		
Tubers		
Flowering	0.25 grams per 20 litre of water	
Vegetable
